Our Annotated Bibliographies are systematic reviews of over 600 research publications from scholars working in the Social Sciences/Humanities on energy topics.

WHAT DID WE DO?

1. WE TOOK THE SHAPE ENERGY TOPICS.
   - Energy efficiency and using less
   - Competitive, secure, low-carbon energy supply
   - Energy system optimisation and smart technologies
   - Transport decarbonisation

2. WE COLLECTED AND REVIEWED ENERGY-RELATED RESEARCH FROM ACROSS THE SOCIAL SCIENCES & HUMANITIES, INCLUDING:

3. WE CREATED SUMMARIES FROM A DIVERSE SELECTION OF APPROACHES AND SEMINAL PUBLICATIONS OF THE:
   - Titles, Authors, Research aims, Methods, Findings.

4. OUR FOUR THEMATIC REPORTS BROUGHT THESE SUMMARIES TOGETHER IN THEMES; THE ANNOTATED BIBLIOGRAPHIES.

WHY DO WE NEED THEM?

The aim of each bibliography is to provide for both those working in the field and those outside of it—policymakers, practitioners, academics from other disciplines—a taste of the diversity of energy-SSH research and help signpost new sources of information.

The bibliographies make the capabilities of energy-SSH more visible and provide a convincing statement of the policy relevance of SSH perspectives.
